SUMMARY

Highly motivated frontend developer with a strong interest in building accessible, user-friendly interfaces. I am driven by a continuous desire to improve my skills and stay current with modern web development practices. I approach each project as an opportunity to learn and apply new technologies, and I value clean, maintainable code. My goal is to grow as a developer while contributing to meaningful and well-structured products.

PERSONAL EXPERIENCE

1.5+ years Freelance
June 2022 – present

I've been mostly working on freelance projects outside of traditional platforms. I found clients through personal connections and Telegram channels, taking on tasks such as responsive layout development, improving HTML semantics, and adding simple interactive features with JavaScript. I also assisted with academic assignments related to HTML, CSS, JavaScript, and React. Alongside freelance work, I actively developed my skills through personal projects and self-directed learning, deepening my understanding of modern frontend technologies. My personal projects can be found on my portfolio website or Github page.
